Monday - Friday

8:00 AM - 4:30 PM

Evening hours available

Pike County Behavioral Health Services provides increased access to quality behavioral health and referral services for children, adolescents, and adults who are residents of our service area. These services are targeted to individuals who are uninsured, under-insured or are having difficulty finding appropriate behavioral health care close to home.

Our mission is to enhance the availability of good behavioral health service to our community as well as to increase the understanding and acceptance of behavioral health and substance abuse issues, and to actively provide clinical services to Pike County residents in need of the same.

We have the flexibility to offer outreach throughout the community, as well as visit patient's home if needed. All services are provided by behavioral health professionals licensed/certified to provide professional behavioral health and substance abuse programs. This initiative partners with Healthy Minds Healthy Lives of Pike County along with other organizations. This behavioral health service helps the people of Pike County to recognize the importance of behavioral health, increase their knowledge and ability to seek help, and lead high quality, meaningful lives.
