

June is Septic System Maintenance Month

Brought to you by
Pike County Health Department, Home Health & Hospice

When was the last time you had your septic tank pumped and cleaned out?

The Missouri Department of Health recommends every 3 to 5 years. Think about all the toilet paper and waste that gets flushed every day by you and your family. It all accumulates in the septic tank and needs to be cleaned out before a sewage backup occurs and backs up into your basement.

Do you even have a septic tank? Do you know where it is located?

The Missouri Department of Health also recommends that you clean the septic tank filter at least once a year to prevent backups.

Do you have a filter in your tank?

Just remove it spray it off with a garden hose, and replace it.

Have you flushed out your drain field pipes?

If you have a Low Pressure Pipe "LPP" drain field, it too may need to be flushed out and readjusted.

The following Septic Tank Pumpers can clean out your septic tank:

B&J Septic Pumping 573-384-5536

All American / Turnbull Plumbing 573-324-9932

Ted Brown Hauling 573-754-5812

Or look in your phone book for more Septic Tank Pumpers and call for estimates.

If you need septic tank maintenance call one of your Septic Tank Installers:

Gladney Backhoe & Excavating 573-898-5828

Orf Construction 573-324-3552

All American / Turnbull Plumbing 573-324-9932

Clint Bowen Construction 573-470-1079

Or look in your phone book for more septic installers and call for estimates.
